FAQ Interactive Presentations at DATE 2022

1. How are the IPs organized?

Interactive Presentations (IP) at DATE 2022 will consists in two different contributions:

- A 2-minute video of a short advertisement of the poster presentation being scheduled in the specific IP session. The duration of the video is only 2 minutes. You are allowed to show at most 2 slides (cover page included) of PowerPoint presentation, to be uploaded in mp4 format.

- Participation to a live oral presentation consisting in a Q&A discussion with the interested audience during the IP sessions. Each IP session runs in a 45-minute timeslot; IP papers will be grouped by 3 in each virtual room. IP papers are presented interactively supported by a poster following the Penta Chart template.

2. How many slides can be included in the Penta Chart?

Only one slide, following the template provided by DATE 2022 IP presentation guidelines (slide 4). This is a way we have defined to mimic the physical poster you would show in case of having a face-to-face presentation. This slide will be shared with the audience during the IP session.

3. In the provided Penta Chart template, can I change the size of the fonts and blocks?

Yes, sizes and fonts may be modified. The important thing is to keep the five sections we require, anything to improve its readability is welcome.

4. Should I prepare and upload a presentation audio record for the Penta Chart?

No, it is not required to prepare any audio or video for the Penta Chart. The IP session with the Penta Chart is live.

5. For the 2-minute flash presentation, are we expected to also include further slides with the Penta Chart poster to help support it? i.e., create a presentation with the Penta Chart slide included.

The presentation has to be composed of only 2 slides based on the DATE2022 template and the first one has to contain paper titles and authors. There is no specific format for the presentation; you may use part of the Penta Chart or whatever you may want to include to catch the attention of possible attendees for your IP session.

6. How is the IP session organized?

The Interactive Presentation session is a live oral explanation based on a Q&A discussion with the interested audience, supported by a poster following the Penta Chart template. IP sessions run during a 45-minute slot and 3 IP papers are grouped in the same virtual room.
We kindly ask to the presenters to connect to the DATE 2022 virtual platform on time and be ready to share your screen with the Penta Chart. Be aware that there are no session chairs for the IP sessions. Thus, speakers in the same virtual room need to start the session by introducing themselves and coordinate each other to answer to the participants' questions.

7. Do I need to upload the Penta Chart in advance on the conference platform?

Since the presenter will show the Penta Chart from her/his own computer by sharing the screen, it is not mandatory to upload the Penta Chart in advance on the conference website. However, the uploaded file may represent a backup in case of any problem with presenter's computer during the Q&A session.
